

14 December 1972

MEMORANDUM FOR: Mr. William E. Colby
Executive Director/Comptroller

SUBJECT : Snow Emergency Transportation

1. As you know, I live in rural Great Falls (Virginia), about thirteen miles from the Agency. (A map of my home is (or should be) on file with your office, Security and the Motor Pool.) About eight of these miles are traversed by Virginia Route 193, roughly four by a distinctly secondary local rural road (Walker Road/Beach Mill) and the final mile by a graveled private road. In any real winter storm involving serious snow, this route (or much of it) is simply not traversable by a normal auto.

2. Given the above I would like to lay on again the stand-by arrangements for emergency pick-up and delivery that were in effect (though never needed) last year. As noted in last year's request, any vehicle picking me up could of course also pick up other officers such as [redacted] and Dick Lehman, whose homes are either on the direct route to mine or only a few hundred yards off it.

3. If the above meets with your approval, I would appreciate [redacted] [redacted] telling me whom to contact to firm up the details and particulars of notification, procedure, etc.

[redacted]
George A. Carver, Jr.

Special Assistant for Vietnamese Affairs
